

## CLAIMS

1. An external medicament containing acetylsalicylic acid or its  
5 pharmacologically acceptable salt as an active ingredient, for inhibition  
of keloid and/or hypertrophic scar formation, which has analgesic and  
antipruritic activity together.
2. An external medicament containing acetylsalicylic acid or its  
pharmacologically acceptable salt as an active ingredient for analgesic  
10 and antipruritic on the lesion of keloid and/or hypertrophic scar.
3. A method for inhibition of keloid and/or hypertrophic scar formation  
and for inhibition of pain or pruritus on the lesion of keloid and/or  
hypertrophic scar by administering a medicament containing  
acetylsalicylic acid or its pharmacologically acceptable salt in an  
15 effective amount to said lesion of a patient.
4. A method for inhibition of pain or pruritus on the lesion of keloid  
and/or hypertrophic scar by administering a medicament containing  
acetylsalicylic acid or its pharmacologically acceptable salt in an  
effective amount to said lesion of a patient.
